Herndon, USA

Industry: Software Development

“AnyChart was really easy to integrate, and any questions arising were quickly and professionally answered by the support team.”

“There are plenty of features and wide opportunities for customization. AnyChart satisfies the most demanding requirements for a charting solution, so we are glad to have chosen it.”

“These charts are not only user-friendly, but visually appealing as well, which distinguish them advantageously from the competitive products.”

— Sergey Kornilov,  
CEO, Xlinesoft.com

## Xlinesoft.com Chooses AnyChart for Its Web Authoring Tools

Xlinesoft.com is a software development group that focuses on providing innovative, powerful yet easy-to-use Internet-related software products. These products are designed for helping users to make Web authoring easy.

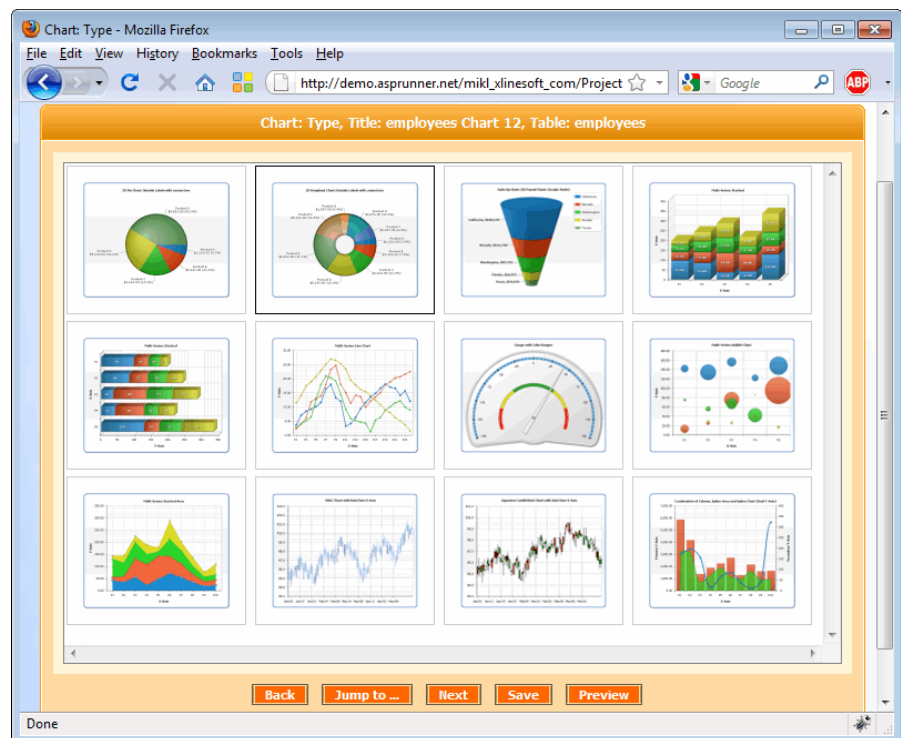

### Challenge:

- Xlinesoft.com creates tools that allow thousands of people to design quickly online PHP, ASP and ASP.NET applications. The ability to display charts is critical for any modern RIA, and most users were demanding modules making possible to visualize data from their databases as charts.

### Solution:

- AnyChart solution doesn't depend on server-side support, which allowed it to work both with PHP and ASP and lower development and licensing costs.
- ASP Runner and PHP Runner with charting modules were released, and users are pleased with perfect design, usability and multiple configuration options of AnyChart charts.

“AnyChart and Xlinesoft.com cooperation has lasted for several years, both parties are content with it, and we foresee the successful continuation of this partnership.”  
— Sergey Kornilov, CEO
