

# AnyChart™

## Data Visualization Solutions

**Cesefor Foundation**  
[cesefor.com](http://cesefor.com)  
Spain

**Industry:**  
Nonprofit

**Stack:**  
jQuery/Codelgniter/  
PostgreSQL

*“I think AnyChart is indeed very complete as a data visualization solution.”*

*“AnyChart made it easy for us to visualize forestry information in a wide range of informative data graphics. Specifically, we used it to build bar, stacked bar, treemap, box, pie, line, and Sankey charts, as well as choropleth and flow maps.”*

*“We did not encounter any major difficulties to integrate AnyChart into our project and all went pretty smoothly.”*

– **Rodrigo Gómez Conejo**,  
Head of ICT & Knowledge  
Management Area,  
Cesefor Foundation

### Cesefor Chooses AnyChart to Visualize Forestry Data in Nemus System

Founded in 2003, Cesefor Foundation is a Spanish non-profit organization aiming to help increase competitiveness and sustainability in the forestry sector.

In 2021, in cooperation with the government of Castile and León, an autonomous community in north-western Spain, Cesefor created a special information system called Nemus.

Designed to streamline the discovery, monitoring, and analysis of various data on the forestry resources, industry, and market, Nemus features a wide range of visualizations ensuring relevant insights are easily accessible and actionable.

#### Challenge:

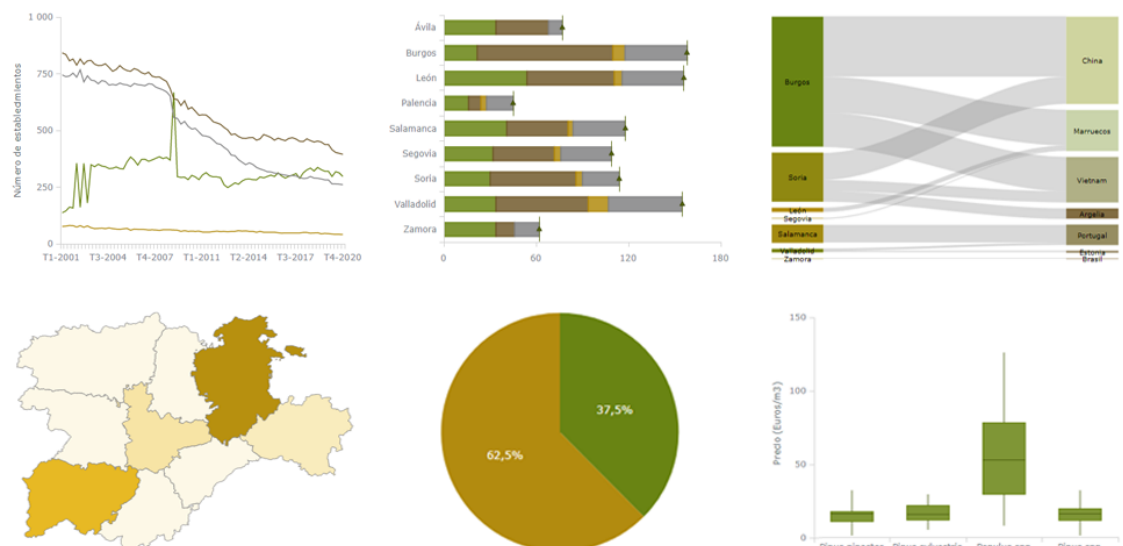

- Present a variety of data about the forestry sector in an insightful visual form, supplying tools for intuitive data analysis within the framework of the Nemus information system built using jQuery, Codelgniter, and PostgreSQL.
- Integrate charts and maps of multiple types to provide a 360-degree view of the forestry value chain in the Spanish region of Castile and León.

#### Solution:

- Cesefor used the AnyChart JavaScript (HTML5) charting library and the AnyMap JavaScript (HTML5) mapping library to create a complex interactive dashboard in the current technology stack.
- All major types of graphics are supported out of the box, so Cesefor easily added all the required visualizations, including regular and stacked bar charts, pie charts, treemaps, line graphs, box plots, Sankey diagrams, as well as flow and choropleth maps.

*“AnyChart is very well-documented and simple to integrate.”*
