

# AnyChart™

## Data Visualization Solutions

**Eugeniy Stern,**  
Independent SAP  
development consultant

**Industry:**  
SAP development

“Planning is a very important part of many business processes, and AnyGantt is a reliable tool for visualizing processes and plans.”

“AnyGantt charts successfully combine self-descriptiveness and lucidity, not to mention visual appeal, which characterizes all AnyChart solutions.”

“AnyGantt is not platform dependent and allows to embed charts in various environments, which is a serious advantage.”

— Eugeniy Stern

### Eugeniy Stern Recommends AnyGantt to His Clients

Eugeniy Stern has been working as an independent SAP development consultant since 1997. He assists large enterprises in oil-producing, oil-refining and transport industries and always seeks for the best solution satisfying the requirements of both customer and industry standards.

#### Challenge:

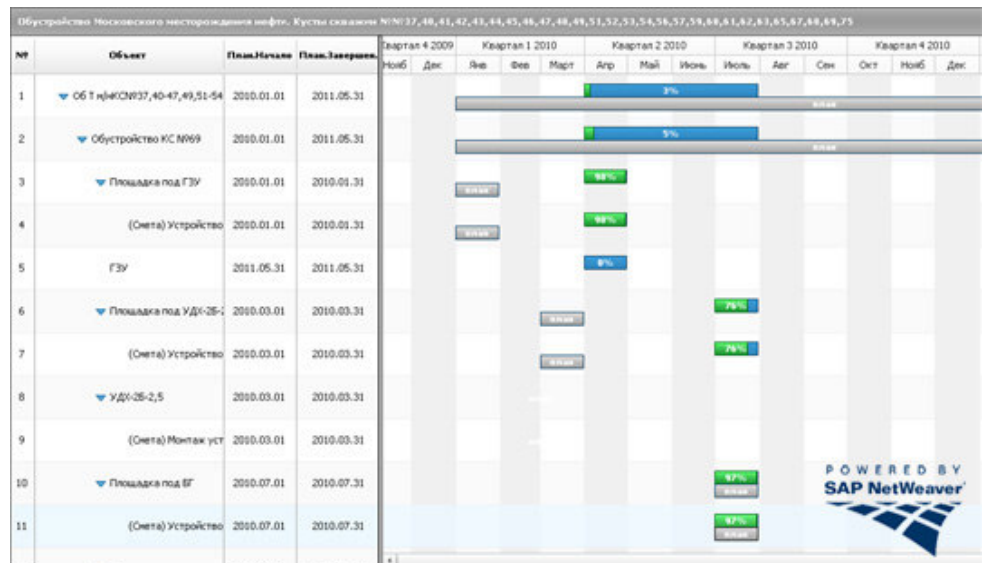

- The SAP NetWeaver technology platform enables the composition, provisioning, and management of SAP as well as non-SAP enterprise software applications. There is a built-in solution for creating Gantt charts, but it lacks visual appeal needed for business reporting.

#### Solution:

- After a market research, it appeared that AnyGantt fits best of all the charting components.
- AnyGantt was recommended to the clients, and during this year, a few projects using AnyGantt in SAP NetWeaver will be launched.

“Everybody is very pleased with AnyGantt, and I’ll keep recommending AnyChart products to my clients.”

— Eugeniy Stern
