ISFB Chooses AnyChart for School Monitoring Solution

Information Systems for Business (ISFB) is a company that develops various IS based on thin client technology, using Drupal as a platform.

Particularly, ISFB created a system that allows monitoring of schools’ readiness for the academic year — the project was implemented for the Ministry of Education of the Komi Republic (Russian Federation). Such monitoring is held each year by a commission that evaluates whether schools match state standards, and in 2011 it was decided to make the results open to public at [http://school.rkomi.ru](http://school.rkomi.ru).

**Challenge:**
- To plot interactive pie charts and stacked bars showing schools’ readiness in different aspects.
- To create charts matching the design of the site and clear for the general public.
- To make an easy updatable visualization so that new data about schools could be added on-the-fly.

**Solution:**
- AnyChart was chosen as a solution. The component supports a vide variety of charts types and different interactivity options.
- Due to XML interface, it is easy to draw and update charts. XML data files can be created both manually and using server side scripts.
- AnyChart is a designer friendly component: it allows easy chart configuration, and provides a convenient way of setting colors for any elements of charts.

“As AnyChart provides much more possibilities than rival solutions. With its help, we succeeded to make the charts match the designer’s conception.”
— Artem Pankov, General Director, Information Systems for Business

Industry: IS Development

“The opportunity to tune all the elements' appearance was a crucial point for this project, and we found that in AnyChart most visual parameters of charts are customized through configuration files.”

“Using AnyChart leaves a positive impression. The prompt reaction of technical support helps to solve any arising problems.”

— Artem Pankov, General Director, Information Systems for Business
